

## Technical Data Sheet

Lithium hexafluorophosphate: LITHIUM HEXAFLUOROPHOSPATE
Formula: $\text{LiPF}_6$
Relative weight: 151.91
CAS NO.: 21324-40-3
Physical Chemical Properties: White crystal or white powder, relative density 1.5, melting point 200°C, strong deliquescent, easy soluble in water, soluble in organic solvents such as low concentration methanol, ethanol, acetone and carbonates. If exposed to the air, lithium hexafluorophosphate absorbs moisture and decomposes quickly, releasing highly toxic HF gas.
Applications: Used in electrolyte of lithium ion batteries for EV, for storage systems and for consumer electronics.
